

Galaxy Series

Luxury Gas Fireplace Collection

Your Gateway To The Universe of Creative Design

Stellar Hearth's Galaxy Series

Offers a variety of standardized shapes and sizes to make a grand statement in any location of the room

Four Standard Lengths: 4', 5', 6', & 7'

Two Sizes Of Glass Height: 2' & 3'

Seven Different Chassis Styles: Single Sided, See Through, Corners Left & Right, Bay, Pier & Four Sided

With taller viewing areas and more BTU's of flame than any others in its class, the Galaxy Series fireplaces are beautiful additions to any room. The multi-sided units make excellent room dividers and the optional mirrored panels create unique reflections that give endless iterations of the fire.

The proprietary Safe-T-Touch™ glass keeps the heat away, so small or vulnerable hands are always safe. Standard LED ember lights with almost infinite color sequences allow you to dial in to any atmosphere you want.

Much more than just great looks,

we've maximized the entire fire experience.

Galaxy Series

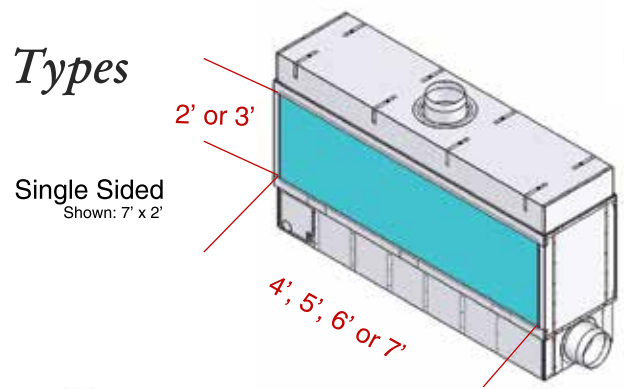

Luxury Gas Fireplace Collection

Designed and Constructed With You In Mind

Standard Features:

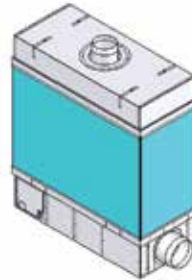

- Safe-T-Touch™ Glass. Our proprietary glass cooling system keeps the heat away from the outer glass surface to ensure a safe experience in any situation
- LED ember lights (with remote control) and Glacier Ice glass media beautifully complement the fire and can be easily changed to any color you'd like
- Co-linear direct vent system with choice of standard powervent system or in-line powervent system, and outside air that can come in the side or bottom of the fireplace
- Flexible venting with up to 110 feet and 11 elbows allowed so you can easily place your fireplace anywhere you want it
- Commercial grade components mean your fireplace is built to last
- Insulated firebox and mechanical intake damper keeps cold air out
- Wall switch - easy access to turn on and off

STANDARD LED LIGHTS AND GLASS MEDIA

Our flames aren't the only dazzling sight in the firebox. Each Galaxy Series Fireplace comes standard with an LED-lighted media bed and Glacier Ice glass media. This includes a remote control to set the lights to a myriad of different hues and patterns to match whatever mood or color scheme you'd like, and can be changed at any time, easily - with a touch of a button. Additional glass media choices available as an option.

OPTIONAL MIRRORED FIREBOX PANELS

The ribbon burner on its own is pretty spectacular, but when paired with optional mirrored firebox panels, it takes spectacular to a whole new level. The mirrors reflect the flames, the glass media and LED lights over and over and over again until it has multiplied into an astral experience. Not available for the four sided units. The above left corner fireplace shown with optional Black Licorice glass media and LED lights off.
